

COSMICULTURE: THE NEW AGE AGRICULTURE

By Dr. T. Galen Hieronymus

Let us begin our appraisal of the new system of agriculture we call cosmiculture with this very suitable quotation by Apollo astronaut Edgar C. Mitchell:

"There are no unnatural or supernatural phenomena, only very large gaps in our knowledge of what is natural. We should strive to fill those gaps of ignorance."

In our work for the last fifty-odd years, that is exactly what we have been doing! We have been pioneers in the exploration of subtle energies, in our attempt to fill the gaps in what is known about the higher, finer energies of matter and energy, outside the electromagnetic spectrum. We feel that so far we have been successful in our quest for knowledge, but we know there is still much to learn. In the 1930s, I did a successful experiment in an effort to learn if solar energy could be conducted over wires. When I found that it could, I realized what a tremendous sea of energy we on this planet are living in!

At that time we had not yet entered the chemical era in which we live today. Then there were no toxic chemical pesticides and herbicides, no sodium-type commercial fertilizers. It's only since the Vietnam War that the nerve-destroying toxic chemicals developed for chemical warfare have been recommended to the American farmer for the purposes of killing insect pests and destroying weeds.

It is only lately that exorbitant prices for inadequate commercial fertilizers and all the modern medicines designed for livestock have made paupers of free-spirited farmers of this nation and other nations, wherever these chemical-farming methods have been exported. Several years ago, as I saw the plight of the producers of food, I got out my 1930 experiments and began seeking ways and means of using the sea of free energy all around us. The result of this experimentation is "The Cosmic Pipe" and our new method of farming we call "Cosmiculture."

First of all, the rules of Eloptic or subtle energy apply to all phases of life on this planet, including the minerals and soil of the planet. Everything is emanating energy, since all things are made of crystallized energy.

It is generally accepted that the atom is the building block of nature. As Dr. Rudolph Steiner, the great pioneer of bio-agriculture wrote and taught, "The natural methods are the best methods. The natural energies provided by nature are the greatest remedies."

We have all around us, as Dr. Steiner reminded us in his lectures on agriculture, a great sea of energy: cosmic energy. solar energy, lunar energy, planetary system energy from the planets of our solar system and the planetary energy or the Eloptic Energy of our planet Earth itself. Without sunlight or the solar energy, there would be no photosynthesis, and no full growth of plants: ergo, no harvests. The other energies are more subtle, but necessary, nevertheless. We also have so much electromagnetic and sonic energy in the atmosphere today that the Federal Government has been considering limiting the number of radio and television stations licensed in the future, because of our present level of electronic and sonic smog.

All this is energy: free energy, which we found may be tapped and conducted over wires. We have been building and testing our Cosmic Pipe for the purpose of carrying these cosmic energies from space down into the soil to be used for the redemption of the farming land from the load of poisons the chemical means of agriculture has imposed upon it, and balancing the soil content.

In order to fulfill our quest for free energy for the farmer, and as a means of cleansing his land from poisons and growing healthy stock and crops, we have had to understand the situation of this planet orbiting in a sea of energies. We had to learn about methods of bringing the energies from the areas mentioned by Dr. Steiner, into practical contact with the earth and the roots of plants. We already had the results of our experiments for over 50 years, with our Eloptic Energy Analyzer and Treatment Analyzers. The use of one of our Eloptic Energy Instruments will give the farmer a means of analyzing and treating poisons out of feed for stock, of eliminating insect pests by treating plants and at the same time raising the vitality of plants. Use of a "Genuine Hieronymus" Analyzer gives the farmer a holistic method of analyzing and treating sick stock, improving the health of flocks, treating fields for improved yields, etc. with the energies of finer media. We trust at the same time consciousness is being expanded so that we may all gain a little more understanding of these energies.

The "impossibility of the impossible" is no longer true by hypothesis as we discover more and more about the nature of energy and the various forms and distinctive categories of energies. All the results of our research on the past is becoming more and more credible today, in the light of what is becoming accepted by scientists and manifested in the everyday working world in which we live. So we combine the "Genuine Hieronymus" Eloptic Energy Analyzer and our proved methods of working with it for best results, with our new Cosmic Pipe, for the achievement of that type of agriculture we call "Cosmiculture." We are now prepared to use the finer media energies for the benefit of mankind.

When the Cosmic Pipe has been installed, it is gathering cosmic energies of space into its head from the air, putting them down a conductor through a resonance chamber to a modulating well, where we place whatever we wish to modulate the energy with. Then it goes down into the amplifier-radiator in the pipe, set at least two feet deep in the ground. There the modulated energies are broadcast horizontally in a broad band out through the soil to the roots of the plants. The results have been tremendous. For many years we have seen soil being treated with soil nutrients, and the use of organic methods show peaks and valleys of soil nutrient deficiencies. In the six years of testing cosmiculture, we have seen soil come into full balance in six months without the addition of tons of nutrients. Harvests have been doubled, the time of production shortened by anywhere from two weeks to a month, and the natural sugar content of fruits, melons and berries has been markedly increased. Hay crops have been tripled, with heavier bales.

Tests we have done to evaluate the methods of gathering energy with the pipe have proved that large amounts of copper or aluminum used in some manufactured devices are extremely detrimental to people and cattle as well as plants, so I have eliminated aluminum in the pipe and held copper to the barest minimum possible. We have found that huge amounts of copper radiated into the ground through the soil have thrown the iron-copper balance out of harmony, decreasing the amount of iron in the soil and increasing the amount of copper beyond the needs of plants.

The pipe also has had some effect on the weather in the areas where we have these installed, in 15 states. In our own vicinity, we have noticed that we no longer have violent weather and storms. The rain is gentle and falls often. Temperatures have been mild, compared with temperatures before we installed the big pipe on our land.

We teach the farmer cosmiculture with the cosmic pipes to bring energy into the various fields and to modulate the soil with the re-agents needed by the soil, and with the Genuine Hieronymus Eloptic Energy Analyzer and Treatment Instrument. We now can define this as a holistic method of agriculture which includes use of natural cosmic energies for the soil balance and rejuvenation, and the use of Analyzer and Treatment Unit to balance animal and poultry digestive systems, analyze the animals' needs, analyze and treat water pollution and take care of insect pests. We show you how to graph your data so that you can read and understand the balances and imbalances in your soil, crops, seed and plants.

In this manner, with the tools of cosmiculture, you can have a definite work-plan, based on definite (not guessed at) evaluation of each field's individual needs, the health and food needs of your animals, chickens and turkeys, and a means of correcting such health problems that have resulted from long-time feeding of poisoned foodstuffs. We teach you to eliminate costly guessing techniques now in practice among the "orthodox" farming methods, allowing you to avoid expensive duplication in plant and animal food and health programs. Thus you are able to individually monitor the problem areas and know for sure just where help is needed, and give that help immediately. You can take care of pollution problems and eliminate expensive pesticides and fertilizers. At the same time, your cosmic pipe equipment is balancing and harmonizing your soil, with free energies of cosmic strength and power, resulting in soil balance, enrichment of soil, revitalization of soil, and harmonizing of soil. This treatment of the soil results in earlier fruition, increased yield, higher quality, nutritious crops, healthier stock, greater profits, elimination of pesticides, and reduction in use of fertilizers. The quality of the food you produce will be greatly improved. The net result, of course, is more money in your pocket, a reward for your labor and the satisfaction that is every farmer's birthright: satisfaction with your work, and the rewards and joy of living a harmonious life.
