

Time Course of GDV Images after Drinking Sacred Clay in Purified Tap Water

By Lisa Tully, PhD

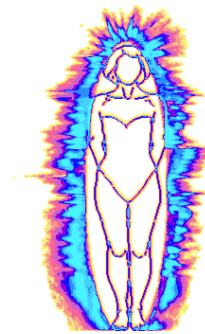

Right hand before consuming Sacred Clay

Right hand 6 hours after the consumption of SacredClay

Subtle Energy Field before.

Subtle Energy Field
6 hours after consumption.

These images are computer generated representations of the finger corona discharge patterns produced by high-voltage electrophotography taken with a Gas Discharge Visualization Camera (GDV).

GDV is a Russian technology that assesses the subtle energy available for metabolic processes in the body. The larger the area of color around the body and the more filled in it is, the better the overall state of health.

The image on the left was taken before consumption of Sacred Clay in purified tap water and the one on the right was taken six hours after the person drank the clay water.

The significant increase in the Subtle Energy Field after clay consumption, demonstrates that Sacred Clay greatly improves ones energetic field related to health.

The following images are GDV shots of a drop of water before and 12 hours after Sacred Healing Clay was placed into the water.
