**INNOVATOR OF BETTER
HEALTH**

**VITALIZER PLUS IS AND
ADVANCED WATER
SYSTEM**

**AWAKENS,
CLEANSES,
ENERGIZES AND
REVITALIZES
YOUR BODY AT THE
CELLULAR LEVEL!**

What is Vitalizer Plus?

**Vitalizer Plus Advanced Water Technology will Awakens,
Cleanses, Energizes & Revitalizes at the cellular level - where it counts!**

The Vitalizer Plus was designed to create an unlimited supply of Hexagonal Water for every day consumption - it's small enough to sit on your kitchen counter - durable enough to make all the hexagonal water you will ever need!

The Vitalizer Plus incorporates basic principles utilized in nature to create a life-enhancing, hexagonally-structured water, your body will love! Nature uses movement (swirling vortices and natural curves), energy (magnetic fields from the earth and far infrared energy from the sun), minerals (naturally dissolved as water flows over mineral formations) and oxygen (incorporated as water splashes and falls). The Vitalizer Plus uses these same principles, to create Vitalized Water in your own home!

The Vitalizer Plus - How it works

The Vitalizer Plus is similar to a blender - and about the same size. Simply plug it in, and 3 different time settings allow you to energize your water to a personal level of preference. The Vitalizer Plus changes any good drinking water into a highly energetic, hexagonally-structured beverage to quench your thirst and much more! (not intended as a water purifier. Do not use chlorinated or fluoridated tap water in the Vitalizer Plus)

A growing amount of evidence suggests that drinking Hexagonal Water has numerous health benefits.... so why not be able to drink all you want? Now, you can create the same living water in your own home with the Vitalizer Plus.

Vitalizer Plus is scientifically documented to :

- Hexagonal Structure Water
- Increase Oxygen water
- Add minerals water
- Alkalinization Water
- Add Energized Water
- Micro Clustered Water

2. welcome to Vitalizer Plus

What is Vitalized water?

Vitalized Water is hexagonally-structured - composed of six individual molecules of water, held together by common hydrogen bonds. This unique water structure is capable of rapid penetration within the cells of your body. Hexagonal water has been scientifically documented to improve hydration, nutrient delivery, waste removal, cellular communication and metabolic efficiency. Vitalized Water contains more oxygen. The Vitalizer Plus creates a vortex of spinning water - incorporating oxygen just like it happens in nature. Vitalized water contains up to 30% more oxygen than normal water!

Vitalized Water contains structure-making minerals - helpful in maintaining the stability of the hexagonal structure. These minerals alkalinize the water-significantly raising the pH. Vitalized Water is highly energized. The energetic forces utilized in the Vitalizer Plus contribute to an energized and electron-rich water, conducive to life and health.

Vitalized Water is wonderful for mixing with soups, juices and other preparations. You'll add vital energy to everything you make. And don't forget your pets and plants. All biological organisms prefer Hexagonal Water. It works for them just like it works for you.

Vitalized Water is affordable!

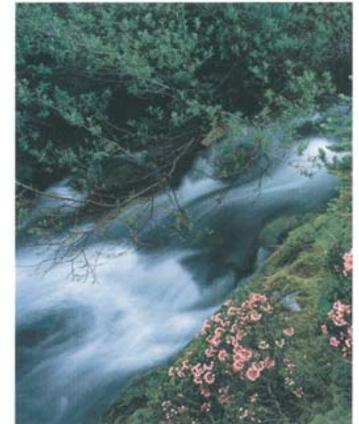

For just pennies a day, you can drink all the hexagonal water you want.

It's Patented

The Technology and design of the Vitalizer Plus are unique. They are protected by US and foreign patents.

Durable Construction

The Vitalizer Plus is made from the finest, durable materials. 1 year repair guarantee.

3. welcome to Vitalizer Plus

What is Hexagonal Water?

Water is a network of hydrogen-bonded molecules. It can form numerous structures, depending on how the individual molecules bond together. The most recent scientific findings indicate that biological organisms prefer the six-sided(hexagonal) ring-structure, found naturally in snow water.

This Hexagonal Water forms a liquid crystalline lattice that is involved in cellular communication, intracellular water movement, enzyme function and many other metabolic processes. The amount of Hexagonal Water in the body has been correlated with aging. It has also been found to form the initial layer of water surrounding healthy cells. On the other hand, unorganized water, has been described surrounding diseased and abnormal cells.

Hexagonal Water is composed of six individual molecules of water, held together by common hydrogen bonds. This unique water structure is capable of rapid penetration within the cells of the body. Most tap water and bottled water is composed of large water conglomerates which are too large to move freely into the cells. It must be re-structured within the body to penetrate the cells (a time-consuming and energy-consuming process).

The importance of drinking Hexagonal Water (Dehydration - linked to disease)

Dehydration is the number one cause of stress in the human body. It has been linked with heartburn, headaches, angina pain, asthma, colitis, diabetes, peptic ulcer pain, high blood pressure, low back pain, blood cholesterol and many other symptoms.

In fact, it is not just the lack of water, but the lack of hexagonally-structured water which is now being correlated with disease. The most recent scientific findings indicate that water forms 3 distinct layers surrounding healthy cells. In healthy tissues, hexagonal water is closely associated with cell membranes, forming the first layer. On the other hand, the initial layer surrounding diseased cells is unorganized water. Hexagonally-structured water is also found in close association with healthy, normal DNA, while abnormal DNA is associated with unorganized water.

Drinking Vitalized Water is one of the easiest and best ways to overcome chronic dehydration and protect your body from the symptoms of disease and premature aging. Within minutes, Vitalized Water moves into the cells, taking nutrients and expelling metabolic wastes in a much more efficient manner.

4. welcome to Vitalizer Plus

Hexagonal water has 6 apparent functions

1. Hydrates the cells

Due to the penetration power of the smaller water molecules, Hexagonal Water is able to quickly move into the cellular environment of the body ? hydrating tissues and enhancing cellular functions. Many notice almost immediate energy.

2. Helps transport nutrients to the cells

Hexagonal water is the water of choice for all biological organisms. Its structure interfaces with the cellular components of our bodies? quickly and easily taking vitamins, minerals and other nutrients into the cells. Many have noted better assimilation of their supplements.

3. Enhances waste removal from cells

Water is also the carrier of wastes from our bodies. The efficiency of Hexagonal Water is often noticed within days? cleansing the body of long-held toxins and metabolic wastes.

4. Supports the immune system

Research has identified the critical role water plays in support of the immune system. Hexagonal Water has been found surrounding healthy DNA and other healthy proteins in the body. Other water structures have been found in conjunction with diseased tissues. Many who drink Vitalized water, notice an improvement in their general health.

5. Improves cellular communication

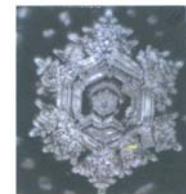

When we are born, the water in our bodies is almost 100% hexagonally structured. This crystalline, hexagonal, water network supports efficient, almost instantaneous cellular communication which has been referred to in quantum physics as cellular coherence.

6. Enhances metabolic efficiency

Water is involved in every process in the body. Hexagonal water has been shown to activate enzymes and enhance many other metabolic functions. Increased energy is a common result.

The unique hexagonal structure created by the magnetics, far infra-red frequencies, vortexing (Brownian motion) and mineral ions, helps to support greater energy and the reactivation of weakened bodily functions.

5. welcome to Vitalizer Plus

Hexagonally-structured water and aging!

Dehydration has been identified as one of the biggest factors in premature aging. When we are born, our bodies are more than 80% water (by weight), but by the time we are in our 20's, it is reduced to an average of 70%. When old age arrives, the total water content of our bodies can be less than 50%. When water is lost from the body, 66% is lost from inside the cells, 26% from outside the cells and the remaining 8% from vacular fluids (blood). In other words, our cells (the functional units of our body) suffer the most when we are dehydrated. Getting Hexagonal water into the cells of our bodies can be one of the most important things we do.

Recent science is showing a correlation between the age-related loss of water and corresponding loss of hexagonal water within the body. NMR technology has documented this age-related reduction in hexagonally-structured water, showing that newborn babies have almost 100% hexagonal structured water in their bodies. By age 36, the average drops to only 56% and by the age of 58, hexagonal structured water in the body can be as low as 23%.

*Scientists have found a correlation
between the amount of unorganized water in the body
and the processes involved in aging.*

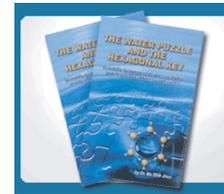

Not only can Vitalized water help to keep the body properly hydrated, it may also contribute to the re-establishment of the perfect matrix in which biological functions occur. Regular and ongoing consumption of Vitalizer water replaces dysfunctional and unorganized water with Hexagonal water, increasing energy at the cellular level and often the effects of aging.

The science behind hexagonal water.

Dr. Mu Shik Jhon is considered to be the world's leading authority on the structure of water. His research has identified Hexagonal Water as the preferred biological choice and his "Molecular Water Environment Theory", which he presented in 1986, states that; 1) Replenishing the Hexagonal Water in our bodies can increase vitality, slow the aging process and prevent disease. 2) Aging is a loss of Hexagonal Water from organs, tissues and cells and an overall decrease in total body water.

Dr. Jhon's book, *The Water Puzzle and the Hexagonal Key*, recently translated into English, summarizes his 40 years of research. It includes studies that show hexagonally-structured water has been associated with;

- Heightened immune function
- Rapid hydration
- The efficient removal of toxins
- Longevity
- Weight loss
- Enzyme activation
- Greater overall health

Hexagonal Water is energetically more powerful!

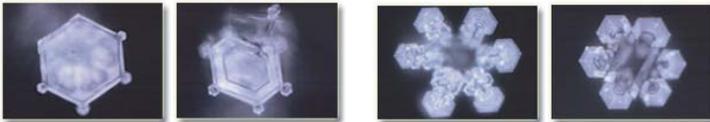

Dr. Jhon's research has helped to show why Hexagonal Water is energetically more powerful than unstructured water. The amount of energy (calories) that Hexagonal Water can store/transfer is measurably greater than unstructured water. This is an indicator of its capacity to perform work within the body and it explains why Hexagonal Water is the preferred choice of biological organisms. According to Dr. Jhon's research, Hexagonal Water is able to activate enzymes, support the immune system and contribute to greater metabolic balance.

Dr. Jhon has also found Hexagonal Water surrounding healthy DNA - a thin layer of highly structured water which appears to insulate, support and protect DNA from stresses which might cause malfunction or distortion. According to Dr. Jhon, "...when the structure of the water near cells is compromised, the cells are more vulnerable to external stimuli. Ultimately, cells surrounded by less structured water are weaker and more prone to malfunction and genetic mutation." He has expressed personal gratification that his life's work is finally resulting in technology like the Vitalizer Plus which hexagonally structures water and makes it easily available for regular consumption.

Laboratory Testing - Hexagonal structure testing

Dr. Masaru Emoto's false photography, featured in the recent movie, *What the Bleep Do We Know*, illustrates enhancements in the water's ability to form beautiful crystalline geometry after only 9 minutes in the Vitalizer Plus. These photographs show the long-term stability of the hexagonal state of water produced in the Vitalizer Plus.

Photos of distilled water vs. Vitalized water (below), clearly indicate a higher energy state of vitalized water and a much greater degree of organization structure of the water molecules.

Distilled water

Distilled water treated with Vitalizer Plus for 9 minutes

[Photographs taken by Dr. Emoto's Laboratory in Japan]

Have you ever wondered why snowflakes are always six-sided?

Although a snowflake is fundamentally different than Hexagonal Water (A snowflake contains billions of hexagonal water molecules) it is a reflection of the specific hexagonal structure that water assumes as it freezes.

Snowflakes are formed as super-cooled water condenses around particulate matter in the atmosphere. Super-cooled water is nearly 100% hexagonally structured. It is able to maintain a liquid state, in the upper atmosphere - even at temperatures well below freezing. As this super-cooled Hexagonal Water freezes, it naturally assumes a shape which reflects the hexagonal unit from which it is made.

Dr. Masaru Emoto, in his well-known book, *The Message From Water*, shows how different energies affect water. The beautiful photos in his book are taken following "flash freezing." They provide a graphic representation of the degree to which water is hexagonally structured. His photos of tap water show very little crystallization. On the other hand, the water from some of the world's pristine springs, freezes to form beautiful snowflake-like crystals - the more intricate the six-sided crystal, the greater the amount of Hexagonal Water.

Laboratory Testing - Alkalinity Testing

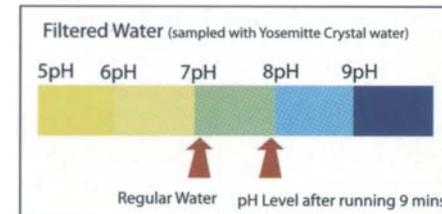

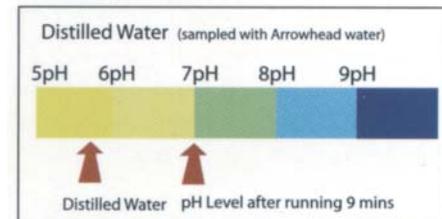

The optimal pH of the blood and other fluids in the body is slightly alkaline, yet even individuals who consider themselves to be healthy, often measure in the acidic range.

An acidic pH is often the first step down the road to disease and ill health and many of us are walking that road without even knowing it!

Did you know that most filtered, bottled, distilled - even reverse osmosis water products, are acidic? They contribute to the already chronic acidity in our bodies. Drinking alkalized water can make a difference, helping to move the body from an acidic to a more alkaline pH!

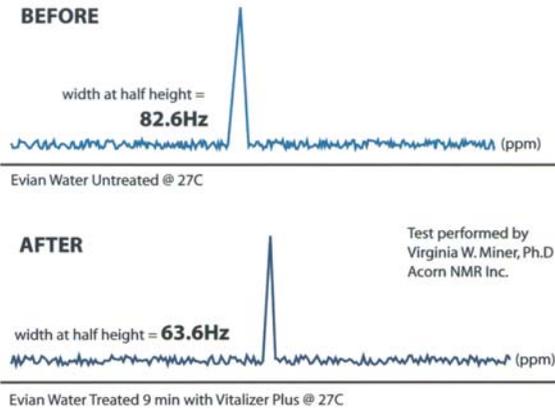

The Vitalizer Plus alkalizes your water, bringing even distilled water, to an alkaline pH. And, depending on the initial pH of the water, the Vitalizer Plus can bring the resultant pH up as high as 8.5.

pH Level Test Alkalinity Measurement

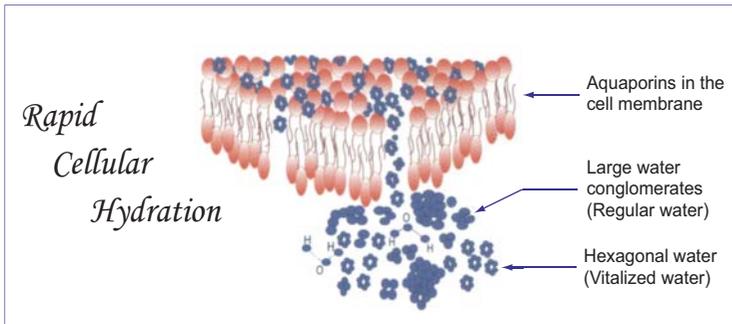

Laboratory Testing - NMR Testing

The use of pulsed NMR(Nuclear Magnetic Resonance) Testing is a valuable tool for validating molecular structure. Line widths indicate the size of the molecule as determined by its rate of rotation. NMR was used to show that water cluster size was reduced after using the Vitalizer Plus Advanced Water Technology System. Hexagonal Water contains smaller, ring-shaped molecular units that are more mobile within the body. Hexagonal Water is a more efficient carrier of oxygen and nutrients.

Vitalized Water is micro cluster water!

Laboratory Testing - Kirlian Photo Testing

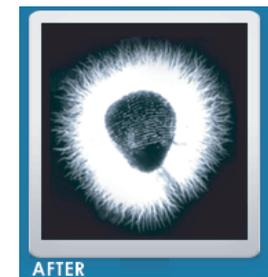

The earth is a highly energized body, with natural forces which play a critical role in our health and well being. The forces of nature (gravitational and magnetic fields, sun, wind, lightning, etc.) contribute to an energized and electron-rich environment, conducive to life and health.

Vitalized Water is Energized!

When left undisturbed, Mother Nature produces highly energized water - the result of turbulence and an interaction with the forces of nature. Magnetic fields and far infrared wavelengths re-align water molecules and contribute to the hexagonal structuring of water.

The Vitalizer Plus uses two powerful magnets arranged with opposing polarity. These magnetic forces, along with far-infrared ceramics, simulate nature's natural structuring and energizing processes for a highly energetic water.

Kirlian Photography is a process that uses high frequencies and electron streams to take pictures of the invisible radiating energy fields that surrounds all living things. Through a Kirlian camera, we photographed the energy radiating from the fingertip of a healthy individual before and after drinking 8 ounces of Vitalizer Plus water.

Laboratory Testing - Dissolved Oxygen (DO) Testing

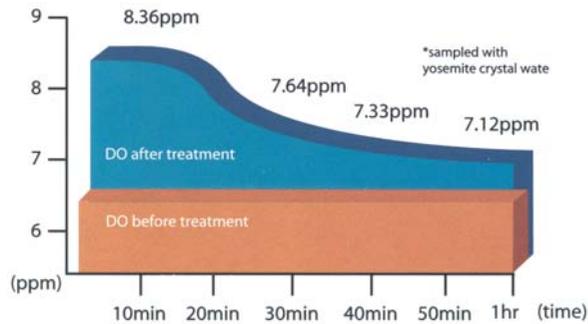

As water trips and falls, splashing over rocks, it picks up oxygen. Oxygen is a purifier, reducing harmful bacteria and other detrimental organisms. Oxygen adds a powerful element to drinking water - especially in an age when the levels of oxygen on the planet have been seriously depleted.

It is a scientific fact that bacteria, viruses and fungi cannot survive in an oxygen-rich environment. As such, the lack of sufficient oxygen becomes a significant contributor to disease and ill health. One way to increase the amount of oxygen available to our tissues, is to drink an oxygen-rich water.

The Vitalizer Plus creates a vortex of spinning water - incorporating oxygen just like it happens in Nature. In fact, Hexagonal Water holds more oxygen than unstructured water.

Dissolved oxygen testing shows that the Vitalizer Plus adds significant oxygen - even to already good quality bottled water. Using Yosemite Crystal Water, dissolved oxygen levels were tested before and after Vitalizing.

The Vitalizer Plus increased dissolved oxygen content by over 30%.

D.O meter

Laboratory Testing - BioMeridian Testing

When left undisturbed, Mother Nature produces highly energized water, with cosmic energy that is difficult to quantify. However, when consumed, the body shows signs of having been energized. This can be (galvanic skin response) to show its reaction to a variety of energetic influences.

The BioMeridian testing device is one of a class of testing devices that utilizes the galvanic skin response as a method of determining the body's response to energetic influences (including food, water, vitamins, medicines etc.).

The system was developed on the basis of oriental acupuncture which correlates points on the body with various systems and organs. By measuring the conductance at various points on the body, the energetic health of organs and systems can be measured. The BioMeridian device is widely used by health professionals and is listed with the FDA.

Testing before and after drinking Vitalized Water shows that within minutes, the organs of the body can become balanced.

(A balanced organ indicates homeostasis - the state in which it has enough energy to perform its designated function(s). Balance does not necessarily indicate health, rather, it indicates that at a designated moment, an organ has the energy to move in the direction of health.)

Laboratory Testing - Bioelectrical Body Composition Analyzer Testing

The younger a person is, the greater the amount of total water movement or cell water turnover they experience. Newborn babies experience the fastest water turnover of any stage in life. In other words, the water in a baby's body moves easily and rapidly into and out of the cells, continually replenishing nutrients and expelling wastes. Babies are able to move water more efficiently than adults.

Metabolic rate has been correlated with cell water turnover and both have been linked with health and aging. Cell water turnover is a marker for overall health and longevity. Smaller, hexagonal units penetrate cells more rapidly. This can have an overall effect on metabolism, nutrient absorption, waste removal and overall health.

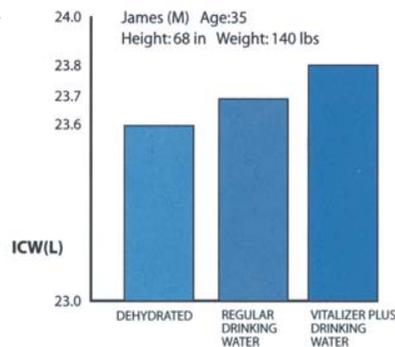

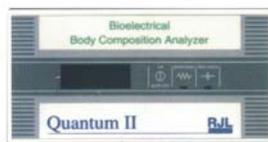

Drinking Hexagonal Water improves cell water turnover!

The Bioelectrical Body Composition Analyzer(BBCA testing)is a medically approved device which is registered with the FDA.

It is considered one of the most accurate ways of measuring hydration and cell water turnover. When individuals drink 8 oz. of filtered or spring water, the device will show water movement at the cellular level in 45-60 minutes (this is considered normal). But, when individuals drink 8 oz. of Vitalized water, water movement is shown in as little as 10 minutes!

Vitalized water easily penetrate the cells-hydrating, cleansing, and revitalizing at the cellular level! Testing with the BBCA shows enhanced levels of intra-cellular water (water inside the cells) when drinking Vitalized water. This is a result of increased water mobility within the body.

14. welcome to Vitalizer PLus

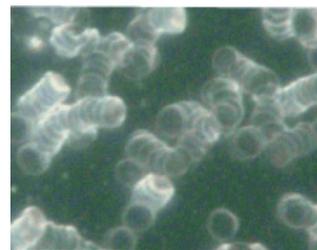

The chart shows more efficient flow of water molecule with Vitalizer Plus treated water.

Laboratory Testing - Live Blood Analysis

Live blood analysis with dark field microscopy offers the unique ability to view the blood in real time. Trained professionals are able to note the presence of conditions in the blood that contribute to sickness and disease.

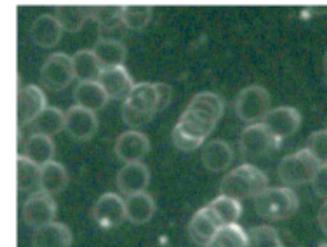

One of the most common conditions found during live blood analysis is stickiness (Rouleau) of the red blood cells. This creates sluggishness in both the circulatory and lymph systems and inhibits both nutrient and oxygen uptake, as well as the elimination of cellular wastes. Live blood analysis illustrates the rapid reduction in clumping of the red blood cells, (representing the capacity for greater oxygen uptake and more efficient nutrient utilization) following the consumption of vitalized water.

Actual live blood sample before consuming Vitalized water. Note the clumping of red blood cells.

This photo was taken of the same individual, 10 minutes after the consumption of 16 oz. of water vitalized in the Vitalizer Plus.

Note the separation of the red blood cells-for improved oxygen and nutrient uptake.

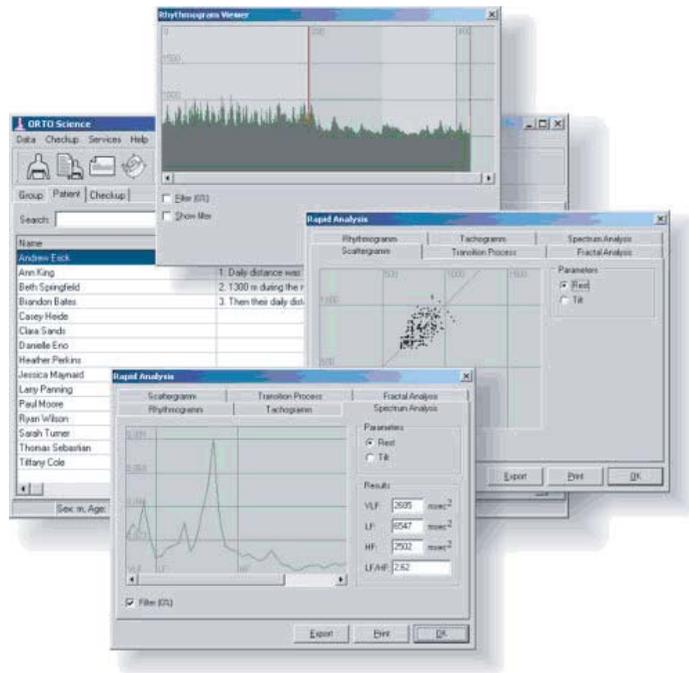

[Photos courtesy of Stefan Schoeman Bio House clinic, South Africa]

15. welcome to Vitalizer PLus

Laboratory Testing - Heart Rate Variability

Heart Rate Variability (HRV) testing is a non-invasive, medically approved, computerized system designed to access the state of health in an individual by determining the stress on the Autonomic Nervous System. Readings are so accurate they can predict heart attacks to within the hour.

In preliminary testing, HRV scores improved (up to 30%) within a short period of time following the consumption of vitalized water.

Laboratory Testing - Laboratory Testing

Living water contains ionic minerals - incorporated naturally as water rushes over rocks and mineral formations. Minerals are considered the sparks of life since they are catalysts to nearly every metabolic reaction within the body. However, minerals must be in an ionic state - not suspended as in many colloidal products - in order to be absorbed and utilized at the cellular level. A balance of essential, ionic minerals adds "life" and a smooth taste to water.

Certain minerals (Calcium, Sodium, Zinc and others) contribute to the hexagonal structuring of water. Other minerals (chlorine, fluorine, aluminum etc.) are referred to as structure-breaking minerals? they actually reduce the amount of hexagonally structuring in water.

The Vitalizer Plus contains a mineral core, with a balance of ionic minerals from coral sand* and other sources, which are released slowly as the water swirls. Minerals include a predominance of structure-making ions: Calcium, Magnesium, Potassium, Phosphorous, Sodium and others. The resulting water is not only mineralized, but alkalized as well.

*A word about coral sand: Coral sand (otherwise known as coral calcium) contains over 70 different organically-complexed minerals and trace minerals. Coral, a once living organism, is one of the most balanced mineral supplements available. Not only are the minerals proportionately balanced, they have also been assimilated by a living organism and are therefore "organically complexed" so that the human body can recognize and utilize them in an available form.

Vitalizer Plus - It's up to you!

Easy to use - The Vitalizer plus is similar to a blender. Plug it in, turn it on, choose from 1 of 3 time settings, and watch a beautiful vortex begin to transform your drinking water into oxygenated, mineralized, hexagonal water - within minutes!

Three different time settings - Allows you to energize your water to a personal level of preference. We suggest the 9 minute setting to start.

Works with drinking water - The Vitalizer Plus changes any good drinking water into Vitalized water - right in your own home!

(The Vitalizer Plus is not a water purifier. Do not use chlorinated/fluoridated tap water in the Vitalizer Plus.)

Use it to cook with - Vitalizer water is wonderful for mixing with soups, Juices and other preparations. You'll add minerals and vital energy to everything you make.

For plants and animals -

Watering plants with Vitalized water is an excellent idea! Remember, all biological organisms prefer hexagonal water. It works for them, just like it work for you. your pets and animal friends will appreciate it.

Affordable - Now you can drink all the Vitalized hexagonal water you want, for just pennies a day!
