

# "Pain, Pain, Go Away..."

Lumen Photon Therapy™ pads have many therapeutic benefits, including relieving pain. The devices use light-emitting diodes (650 nanometer) and near-infrared wavelengths in seven different frequencies.

*The FDA has approved these powerful, conveniently sized models for:*

- Increased local circulation (important for people with restricted circulation in the extremities)
- Reduction of pain (neck, back, joint, etc.)
- Improved range of motion
- Muscle relaxation (reduction of tension and spasms)

*In addition, preliminary studies show that Lumen light pads are helpful for cavitations (tooth infections).*

The units consist of two parts: the light pad, and a small microprocessor that controls the frequencies.

Both models offer 8 settings; the instruction manual tells you which frequencies to use for specific health issues. Treatment time can be set at 15 or 30 minutes.

Pads are made of soft Neoprene and operate on AC power. Lumen units are lightweight and can easily be taken with you to the office or on a trip.

■ Model 90 (at far left of photo) measures 4" wide by 8" long and is suitable

for small areas of the body. It features 50 infrared diodes and 40 red LEDs.

■ Model 264 (right in photo) measures 7.5" wide by 14.5" long, and is useful for larger areas such as the back. This model has 144 infrared diodes and 120 red LEDs.

■ Model 132 (not pictured) is 7.5" wide by 8.5" long. Features 72 infrared diodes and 60 red LEDs.

■ Dual: (not pictured) has 2 #132 pads which allows treatment on separate areas simultaneously.

Lumen Model 90:	\$ 849
Lumen Model 132:	\$ 999
Lumen Model 264:	\$1,499
Lumen Dual:	\$1,599
